EXPERIENCE

Web Developer and Programmer

BASO Project (Tech team from High School)

January 2023 - May 2023

I designed, develop and deployed the entire website with HTML, CSS, vanilla JavaScript and GitHub Pages. I also programmed a bit with C++ in Arduino Uno to overcome the CanSat project, a competition organized by the European Space Agency. More details on my portfolio.

EDUCATION

Technological/Scientist High School Grade

IES Binissalem

September 2021 - June 2023, Binissalem, Mallorca

Where I developed myself as a dedicated person, studying and programming at the same time to improve my skills and the way I was learning many different areas, including both, the code and the high school. I learnt a lot with BASO Project due to, when we did the CanSat Project my team and me immersed into a real productive group and we develop/built our further challenges.

Higher Technician in Web Development

Ilerna Online

September 2023 - Present

Through this grade, I learnt many technologies by myself in some other platforms that provide courses, which made me improve in terms of code on: best practices, programming languages, frameworks... Inside the grade I learnt some other technologies such as PHP or MySQL. And now I am getting prepared for the final grade project.

Languages

-  Spanish - Native
-  Catalan - Native
-  English - Intermediate

Front-end Stack

-  HTML
